Product must be installed by registered Plumber in accordance with the PCA and AS/NZS3500.

NOTE:- Determining the spout length.
The spout aerator should reach approx. centre of Cleaners Sink e.g. - if using a standard 450mm sink then allow 80 for tap offset + 150mm (6") for spout, giving a reach total of 230mm = near to centre of bowl.

6" SPOUT

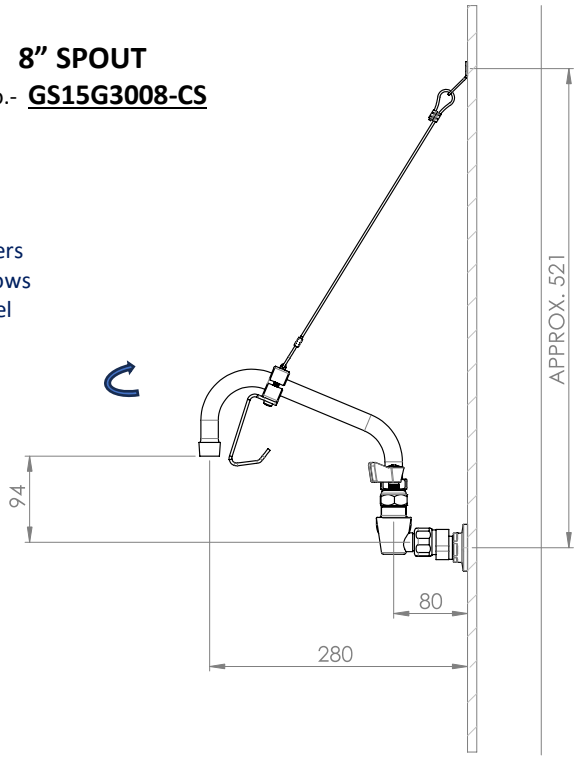

Pt. No.- **GS15G3006-CS**

The Cable Offers Support & Allows Spout to Swivel

8" SPOUT

Pt. No.- **GS15G3008-CS**

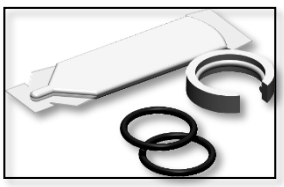

FEATURES :-

1 – Bucket Hook & Cable Brackets are made from 304 S/S.
2 – The Cable is S/S with a PVC Coating for Hygiene.
3 – The Wall Cable Bracket must be mounted to a stud or some other form to support weight. (This is the responsibility of Installer. If no support, then DO NOT fit and remove from spout.)
4 – Height positioning of the Wall Bracket is left to the installer to determine. Above is a guide.
5 - The two spout sizes are the best for filling bucket in the right position. Not Short / Not Long.
6 – All spouts are made from S/S tube and come with a highly polished finish. Other longer spouts are available if required.
7 – All Global Stainless Taps are made from 304 Stainless with a Highly Polished finish.
8 – Installation is responsibility of installer and is not included in our warranty.
