‘Global WASHWARE’

HOSE HARNESS & EXTENSION GUARD

Hose Harness

Designed to stop the hose being over pulled & thereby damaging the tap at the wall. It is designed to restrict the over-leverage that can be exert on the hose & tap**.**

A Stainless-Steel Bracket is mounted to the wall below / near the Wall tap, where the hose passes through it & a S/S clamp is mounted to the Hose, which is then tied to the Wall bracket via a S/S Cable.

In Relaxed State

In Stretched State

Pt. No**. GTHWH-HARNESS**

We reserve the right to update / change either one of these harness designs without notice.

NOTE

We are working new **HARNESS** that can be mounted to the end of our hoses on our Reels.

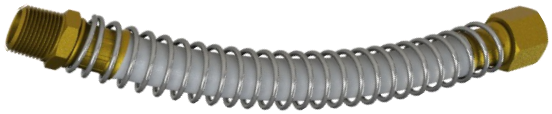

It is designed to **PASS** the **PULLING FORCE** further up the hose **away from the end fitting** & restrict End User exerting to much force on the end fitting & Crimp**.**

See example to the right -

EXTENSION GUARD:-

We designed a Short Replaceable End Hose with its own Spring Guard to stop kinking of hose.
This can me used on any hose or brand of reel that has a ½” Female fitting.

Pt. No. **GTH-EXT-300**
